Shri Lanka, UAE, Kazakhstan, Georgia, Vietnam,
Malaysia, PR of China

Located in the Dehkanabad district of the Kashkadarya region, JSC "Dehkanabad Potash Plant" is the only large enterprise producing potassium chloride mineral fertilizer, and it was established in 2010 on the basis of the Tepakutan deposit.

On August 28, 2010, the enterprise produced its first batch of potassium chloride mineral fertilizer, which was sold for the first time on the local market of our republic.

Today, the enterprise fully supplies its products to the main consumers of potash fertilizers — farms, clusters, and private entrepreneurs. On Uzbekistan's local market, our enterprise delivers its products to customers through the JSC "O'zRTXB" exchange trading platform.
