# Argon

## 1. Description:

An inert, colorless and odorless monatomic gas.

## 2. Technical characteristics:

Purity: 99.998%

Density: 1.784 kg/m<sup>3</sup>

Boiling point: -185.8°C

## 3. Chemical composition:

Ar

## 4. Form:

Compressed or liquefied gas

## 5. Application:

Welding, metallurgy, protection against oxidation.
