JSC "Uzkimyoanoat" Strengthens Integration of Science and Production

JSC "Uzkimyoanoat" is actively developing cooperation with leading universities and research institutes to improve quality and efficiency of production through the integration of science, education, and industry.

This collaboration helps effectively address emerging production challenges and implement new projects within the industry's enterprises.

Among current projects is a joint initiative by the Innovation and New Technologies Department of

JSC "Uzkimyosanoat" and the Faculty of Inorganic Substances at the Tashkent Chemical-Technological Institute. They are working on a project to recover used sulfuric acid and purify organic waste during acetylene production.

The practical application of universities' scientific potential and strengthening cooperation with major industrial enterprises contributes to the improvement of technological processes and the implementation of modern technologies in production.
